

Javelot Announces Strategic Expansion into the **United States**

Javelot, the leading AgTech company in post-harvest grain management, specializing in storage optimization, advanced monitoring, and supply chain solutions, is thrilled to announce its strategic expansion into the United States market. This significant milestone in our global growth journey underscores our dedication to investing in American agriculture. Our goal is to enhance the competitiveness of the industry and support more grain cooperatives and trading companies in their digital transformation.

Meeting the Needs of the U.S. Grain Industry

With a proven track record of success across Europe, Javelot's comprehensive hardware and software platforms enable grain trading companies, grain co-operatives, and grain storage companies to standardize storage supervision and practices, to monitor grain quality and traceability in real-time, and optimize their entire grain supply chain, while decreasing operating cost and protecting trading margins. The company currently monitors over 600 million bushels of grain for more than 150 clients across 12 countries, including industry leaders such as Frontier Agriculture (Cargill) and BayWa, Europe's largest grain trading company.

The U.S. grain industry is under growing pressure to enhance operational efficiency while preserving quality and resilience. We are committed to supporting major grain players in protecting their trading margins and strengthening their business resilience," said Félix Bonduelle, CEO and Co-founder of Javelot.

"Our technologies have demonstrated significant benefits and ROI for European grain majors, and we are confident that American grain majors will experience similar positive outcomes adjusted to their scale. We are committed to investing in the U.S. market and contributing to the continued success of American agriculture."

Proven Results for Grain Operations

Javelot's technology platforms delivers measurable benefits to grain operators, including:

- Reduce storage losses with real-time monitoring and proactive issue detection, ensuring maximal grain quality.
- Lower energy costs through intelligent automation of aeration and temperature control systems, enhancing operational efficiency.
- Advanced storage hypervision through state-of-the-art monitoring and management of storage sites, providing comprehensive oversight and control.
- Enhanced grain traceability for improved tracking and visibility throughout the supply chain, ensuring transparency and accountability.
- Optimize logistics costs by up to 25% through enhanced supply chain planning and resource allocation, streamlining operations and reducing overhead.

Investment in American Agriculture

"We see tremendous opportunity to partner with American grain farmers, trading companies, cooperatives, and operators of all sizes" said Benjamin Coatanea-Hubert, Javelot's US Head of Business Development "Our platforms are designed to integrate seamlessly with existing infrastructure and IT architecture while providing powerful new capabilities for monitoring, analysis, and optimization. We look forward to collaborating with U.S. grain majors and farmers to enhance their operations and profitability."

About Javelot

Founded in 2018, Javelot specializes in innovative post-harvest grain technology solutions. Our platform helps grain farmers, trading companies, cooperatives, and operators optimize storage conditions, preserve grain quality, and enhance supply chain efficiency. With a client base that includes some of the world's largest agricultural companies, Javelot currently monitors over 600 million bushels of grain across Europe and beyond. We are dedicated to promoting sustainable agriculture through the intelligent use of technology and data.
